

# ARTIFICIAL GRASS

## SURFACING BENEFITS INCLUDE:

- Enhances natural spaces
- Natural appearance
- Fully porous
- Realistic and tactile
- Durable & hard wearing
- Low maintenance

## COMMON USES INCLUDE:

- Play area safety surfacing
- Rural areas & natural settings
- Decorative landscaping

## OTHER FEATURES INCLUDE:

- 2D graphics can be incorporated
- Colour options available upon request
- Various pile heights and blade shapes
- Certified to EN1177

Safety Surface  
Examples

Artificial grass safety surfacing is an ideal solution for schools and nurseries that require a hard wearing surface that is low maintenance and provides children with a safe natural looking play area that can be used all year round. When installed under play equipment, foam shock pads may be required under the grass to increase the critical fall height and offer protection against injuries that could occur from a trip or fall.
